

B-24D Liberator

"Strawberry Bitch"

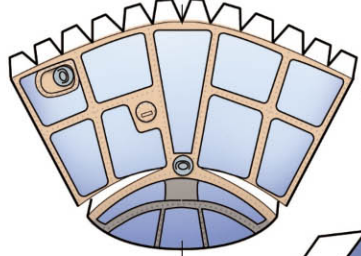

376th Bomb Group, 15th Air Force
1943

Nose Glazing

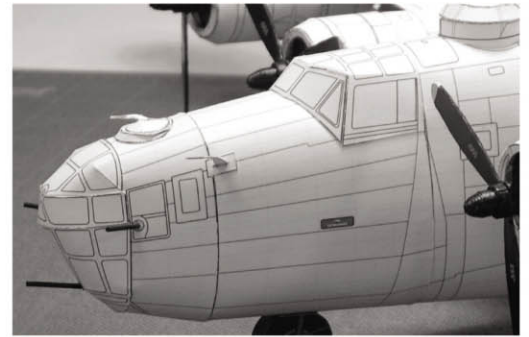

Cockpit Canopy

Score tabs.

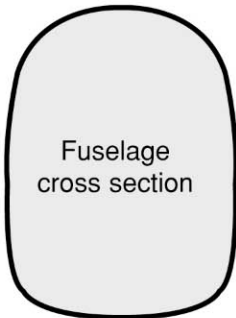

Score dotted lines

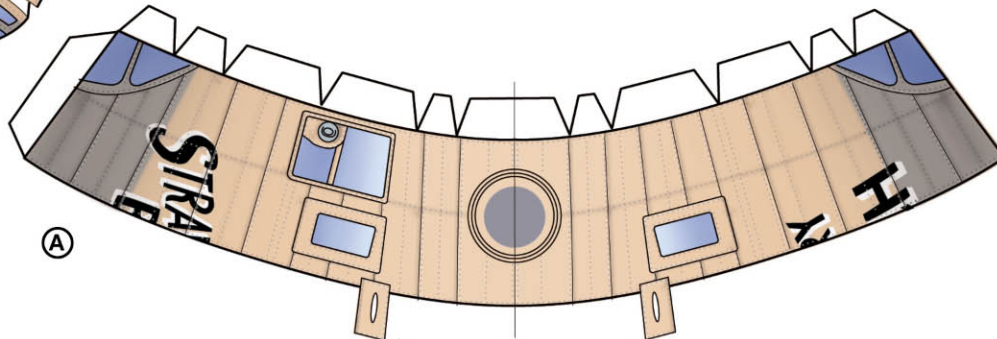

• Assemble parts A, B and C first. Then add windshield followed by nose piece. This will aid in getting the fuselage started into the proper shape.

Be sure to add enough ballast to get the plane to sit on its tri-cycle landing gear properly.

• This tab aids in gluing on the nose wheel. Use a black marker to color in wheel well. If building the model with landing gear up, remove this tab.

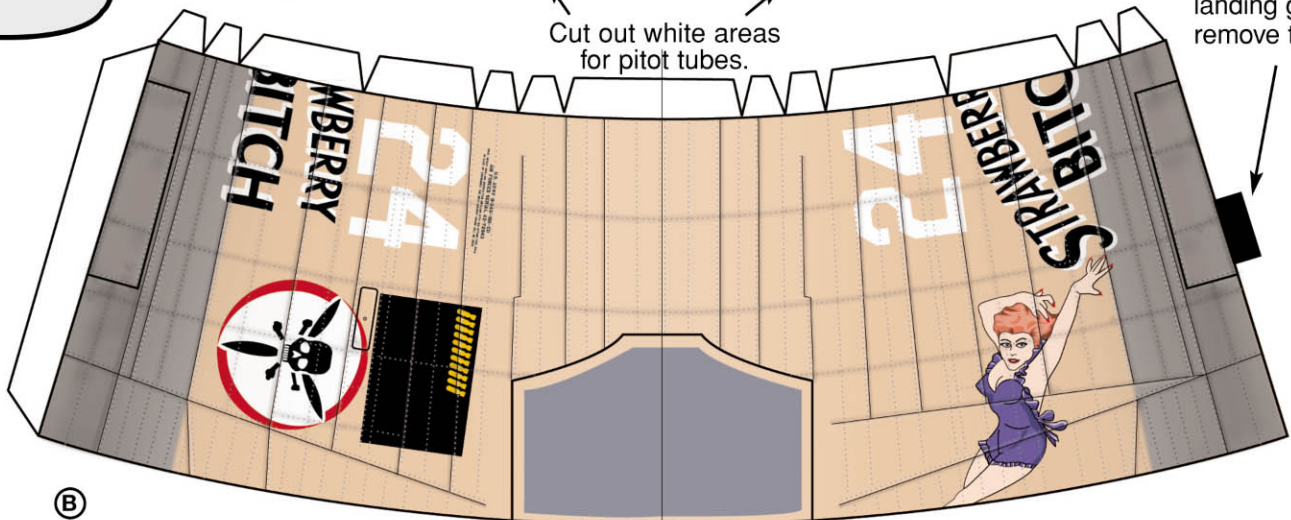

Fuselage cross section

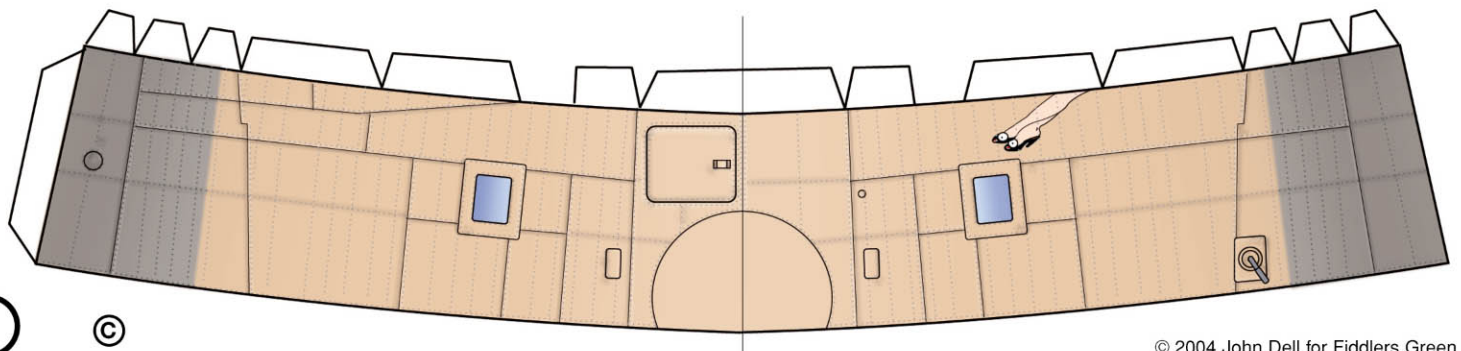

(A)

Cut out white areas for pitot tubes.

(B)

(C)
